

Features of the device

- ◆ 1-button remote control transmitter;
- ◆ Works with F&Wave remote control receivers;
- ◆ Ability to control any number of receivers;
- ◆ ON/OFF (bi-stable switch) with receivers: FW-R1P, FW-R1D, FW-R2P, FW-R2D, FW-D1P, FW-D1D, FW-LED2P, FW-LED2D;
- ◆ Raise/lower the roller blind with receivers FW-STR1P, FW-STR1D;
- ◆ Dim/brighten the lighting with receivers FW-D1P, FW-D1D, FW-LED2P, FW-LED2D;
- ◆ Installation does not require a flush-mounted box.

Pairing

1

After you successfully connect the receiver, press and hold the PROG button until the device switches on the output circuit and the communication LED goes off.

2

Press the button.

3

If the pairing is correct, the output circuit will be momentary switched off and the LED in the receiver will switch on again.

Exit from the programming mode of the receiver occurs automatically after 30 seconds of waiting for a signal from the transmitter or by briefly pressing the PROG button.

Each channel of the receiver can be paired with eight different transmitters (remote buttons). Pairing with more buttons will remove the first entries made in the receiver.

Unpairing

Unpairing of the wall button from the receiver is only possible by clearing the list of all transmitters in the receiver. To clear the list of transmitters cooperating with the receiver, press and hold the PROG button for a minimum of 10 seconds. Fast flashing of the communication LED indicates that the memory of the controller is cleared.

Button configuration

Due to the nature of transmission and retransmission it is not recommended to use the same button on the transmitter more often than every 2 seconds. Switching the receiver may occur with a slight delay.

It is not recommended to use remote bi-stable transmitters to control a group of receivers due to the risk of the switching status desynchronization (especially when working with larger distances and/or simultaneous use of the local buttons on the receivers).

Battery replacement

①

Remove the frame by prying it gently with a flat tool in the cut dedicated to this purpose.

②

Fold up the button.

③

Remove the battery from the holder.

④

Install a new battery paying close attention to the correct polarity. The "+" sign on the battery up.

⑤

Close the button and then set up the frame with notch facing up.

Do not dispose of the used batteries in the trash! User is obliged to hand over waste batteries to the collection point for recyclable materials.
